SUMMARY

Aspiring Data Analyst with hands-on business operations experience in a family-owned jewellery retail business, analyzing sales, inventory, and customer data to improve reporting and support decisions. Proficient in SQL, Python, Excel, Power BI, and DAX, with experience building end-to-end analytics projects and interactive dashboards. Seeking an entry-level Data Analyst or Business Intelligence role to apply this combination of business understanding and technical skill.

TECHNICAL SKILLS

- **Programming & Data Analysis:** Python (Pandas, NumPy), SQL, Excel (Pivot Tables, LOOKUP Functions, Power Query)
- **BI & Visualization:** Power BI, DAX, Data Visualization, Plotly, Matplotlib
- **Analytics:** Data Cleaning, EDA, KPI Reporting, Customer Segmentation (RFM), Business Intelligence Reporting
- **Tools:** Git/GitHub, SQLite, VS Code

RELEVANT EXPERIENCE

Business Operations Associate (Data & Reporting) | Jewellery Retail Business

2022 – Present

- Analyzed sales, inventory, and customer transaction data (~130 transactions/month, ~₹14.0L monthly sales, ~₹10.8K average bill value) in Excel to identify demand trends and optimize product assortment.
- Automated recurring KPI reports using Pivot Tables, XLOOKUP/VLOOKUP, SUMIFS, and IF formulas, reducing reporting time from ~3 hours to ~35 minutes while improving visibility into sales and inventory performance.
- Cleaned and validated daily sales, inventory, and customer records to improve reporting accuracy and ensure reliable business insights.
- Identified repeat customers (~40% of 90 unique monthly customers) through purchase pattern analysis, supporting inventory planning and procurement decisions for high-demand products.

PROJECTS

Retail Store Analytics Dashboard | [GitHub](#)

Python, SQL, Excel, Power BI, DAX

- Built an end-to-end BI pipeline on 5,000+ retail orders — Python-generated dataset → SQL (30+ queries) → Power BI dashboard.
- Wrote 7 DAX measures (YoY growth, AOV, profit margin) across 11 visuals with 5 interactive slicers.
- Flagged high-discount, low-margin SKUs eroding profit through regional and category-level analysis.

Jewellery Sales Analytics Dashboard | [GitHub](#)

Python, Excel, SQL, Power BI, DAX

- Built an end-to-end retail analytics solution using a synthetic dataset (500+ transactions) modeled on Gold, Silver, and Diamond category sales, inspired by real business patterns from running a jewellery retail operation.
- Developed data pipeline using Python (OpenPyXL), performed data cleaning and analysis in Excel/SQL, and created an interactive Power BI dashboard.
- Analyzed revenue trends, category performance, customer behaviour, payment methods, and city-wise sales distribution.
- Identified key business insights including seasonal sales patterns, category revenue contribution, and high-value customer transactions.

Customer Segmentation Dashboard (RFM Analysis) | [GitHub](#)

Power BI, DAX

- Segmented 9,000+ customers into 7 behavioral groups (Champions, At-risk, Lost) using RFM analysis.
- Built 8+ DAX measures (weighted averages, revenue share %, YoY deltas) to power 5 KPI cards and 4 visuals.
